DESIGNER AUDIO

DNA

DNA Designer Audio has set the benchmark in marine audio. Massive amounts of research and development have gone into perfecting DNA Designer Audio's range of marine products. Keeping in mind both sound quality and protection.

SPEAKERS

DNA's stylish 4", 6.5" & new 6"x9" marine speakers have been fully constructed with a special plastic blend, formulated to be corrosive resistant and UV stable and most of all water proof. No need to worry about getting your speakers wet when washing down your boat.

The newest addition to the DNA Designer Audio marine speaker range are the 3" outdoor marine box speakers. Ideal all kinds of outdoor applications. Suitable for both bracket or in-wall flush mount. Available in black and white. Pop up spa speakers have also been introduced into our expanding range.

PROTECTION

Protection is the key when talking about water, boats and the sun. Protect your audio system with your choice of either the marine front or the fully enclosed marine case. Many new marine radio housings and fronts have been introduced to cater for all levels of marine head unit protection. After all you protect your boat so why not protect your radio head unit.

CONTACT

Feel free to contact us to receive your complete catalogue including workshop accessories.

IPOD-DOCK Universal iPod Docking Station For Car, Caravan, and Marine Installations

The iPod docking station offers a safe and secure place to store an iPod while enjoying music or video in your car, caravan or boat.

Fits iPod, iPod Nano (2nd & 3rd Generation), iPod iTouch and iPhone.

Fits different iPod's through the use of interchangeable dock adaptors and inserts to allow different size iPods to fit.

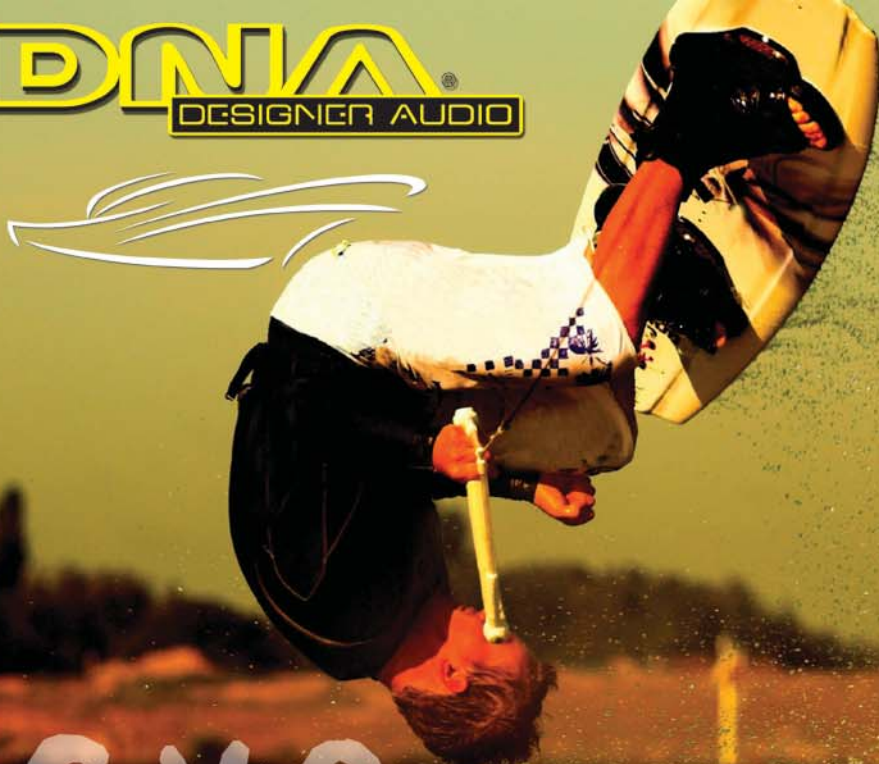

Connectivity

The docking station allows users to enjoy their music/movies on their iPod by enabling you to control your music/movies from a full speed iPod controllable head unit. Simply plug and stow the iPod in the docking station and forget about it and control everything from your head unit. Suitable for brands like; Alpine, JVC, Kenwood and Pioneer that have rear iPod input and are full iPod controllable through the head unit.

(Check your head unit and instruction booklet to confirm if capable of this feature). The docking station connects to any cable with 30 pin iPod dock connector (Not Included).

IDEALLY CONNECTED TO A FULL SPEED IPOD CONTROLLABLE HEAD UNIT. THEN SIMPLY PLUG IN & CONTROL ALL AUDIO THROUGH THE HEAD UNIT!
